

Airways Aviation Foundation Course

Airways Aviation Foundation Course Guide

Introduction

Welcome to the Airways Aviation Foundation Course.

This program is designed to give aspiring pilots a strong introduction to aviation theory and essential skills, helping them decide on the right pathway towards becoming a professional pilot.

It is suitable for students with little or no prior aviation knowledge and provides a clear route into formal flight training with Airways Aviation.

Course Overview

The Airways Aviation Foundation Course introduces students to the fundamentals of aviation and prepares them for progression into **EASA** or **CASA** approved Commercial Pilot Licence (CPL) training.

Graduates of this program gain confidence in aviation studies and the knowledge required to begin professional pilot training.

Duration & Mode of Study

- **Course Length:** 4 weeks
- **Mode:** Full-time classroom study
- **Contact Hours:** Approximately 25 hours per week

Course Modules

The course is delivered across **nine core modules**, each focusing on a key area of aviation theory:

- Aviation English
 - Principles of Flight
 - Aircraft General Knowledge
 - Flight Radio Communication
 - Human Factors
 - Meteorology
 - Air Law and Procedures
 - Navigation
 - Performance & Planning
-

Teaching & Learning

- Interactive classroom lectures and group discussions
- Practical workshops and case studies
- Digital resources provided online (students bring their own iPad)
- Extra activities such as guest lectures, simulator sessions, and visits to airport facilities

Assessment & Completion

- Each subject module concludes with a **multiple-choice test**
- A **minimum pass mark of 75%** is required per subject
- Students who successfully complete the course receive a **Certificate of Successful Completion**
- Students who attend but do not pass may receive a **Certificate of Attendance**

Pathways After the Foundation Course

Successful graduates may progress into Airways Aviation's flight training academies in:

- France
- Finland
- Italy
- Portugal
- Australia

Here, students can enrol in **EASA** or **CASA** Commercial Pilot Licence (CPL) programs for aeroplanes.
